TOTAL, TEN YEARS	\$36,000	\$117,550	\$129,550

Disclaimer: Pricing was completed on Bounce Bark delivered by Wholesale Landscapes to meet NZS5828 specifications of 300mm depth. The comparison information provided is indicative only and these quotes are available on request. For a situationally accurate comparison, a detailed quote from selected suppliers should be obtained.

THE BOUNCE BARK DIFFERENCE

CERTIFIED TO NZS5828:2004 STANDARDS - This helps reduce liability for all persons responsible for school safety including property managers, principals, and board members.

STONE FREE AND MINIMAL STICK CONTENT - As the saying goes; sticks and stones may break my bones... they also cause splinters and grazes.

TEMPERATURE RESILIENT - Bounce Bark is resilient in extreme temperatures. This means it won't heat up in the height of summer and it won't become a slip hazard during wet, icy winter months.

LARGE NUGGET SIZE - Specified and sized to 25-50mm nuggets which adds weight and durability, resulting in a long-lasting product. Low-quality woodchip breaks down quickly.

WASHED - Although Bounce Bark is washed to eliminate transferable mud, this natural bark product will still help to promote the development of a healthy immune system through play in nature.

WIND RESISTANT - Bounce Bark is far larger than woodchip. Its increased weight means it won't get blown out of the play area.

NO DISPOSAL COSTS - Bounce Bark is a natural product and can be re-used around the school, adding value as a garden covering, and eventually a compost.

ENVIRONMENTALLY FRIENDLY - Bounce Bark is a naturally occurring by-product of sustainable forestation. The use of Bounce Bark is environmentally responsible and can reduce a school's carbon footprint through the reduce-reuse-recycle system.

CHILDREN PLAY ON **BOUNCE BARK** FROM DUNEDIN TO LEVIN

"It feels all jumpy when you jump on it."

Jack, age 7

"Well, plastic is actually made from bad stuff for the world. So yeah, I like it, that bark stuff."

Charlotte, age 8

"My friend Jack says it's made from his trees at his house."

Scott Jnr, age 7
