PURPOSE STATEMENT

The purpose of this document is to provide a wide range of industries with up-to-date product knowledge for applying Wholesale Landscapes' products. It is intended for, but not limited to:

- Landscape architects
- Council and local government
- Landscapers and contractors
- Garden and landscape retailers
- Orchardists and vineyard managers
- Nurseries
- Schools and early childhood education centres.

The information included within this document will allow industry workers, consultants and business owners to have confidence in specifying the chosen product, whether it's for a tendering document, pre-specification of product or talking through options with a client.

SAMPLES:

Samples are available for any of the products and can be requested by emailing care@wholesalelandscapes.co.nz. Samples will take 24-48 hours to be packaged up and couriered, if necessary.

PRODUCT SPECIFICATIONS:

The specifications of each product have been noted as accurately as possible. The testing completed includes a combination of independent and verified testing, with in-house testing where appropriate. The recommended use component provides a tool for deciding if the product will be beneficial to the situation. If you are unsure about the use for any of the products, please contact Wholesale Landscapes.

DELIVERY:

Freight volumes are an approximation only. We have strong relationships with freighting companies throughout New Zealand which is reflected in the competitive rates we offer for nation-wide distribution. We operate with an on-time, intact, in-full promise for all our products, which allows customers to have confidence in both the delivery process and our product.

COMPANY PROFILE

Since 1987, Wholesale Landscapes has been manufacturing and supplying New Zealand with loose-form bark-based landscaping media. Wholesale Landscapes' sound reputation is built on experience, expertise and a proven track record. With long-term supply agreements within the forestry sector, Wholesale Landscapes can offer a consistent product at a competitive price, with an on-time, intact, in-full guarantee. Currently employing over 40 staff, over three sites, Wholesale Landscapes has the capacity to fulfil all orders from trailerloads of product, right through to arranging delivery and supply of 10,000m³+ of product to commercial applications.

CORE VALUES:

With our CARE culture, Wholesale Landscapes operates under the following:

Can-do attitude for opportunities, improvement and innovation. We say yes.

Accountability and ownership for everything we do, say and commit to.

Resourcefulness, We believe in being resourceful and making the most of what we've been given.

Enjoyment in what we do and in the relationships we have with our customers, suppliers and team.

OUR WHY:

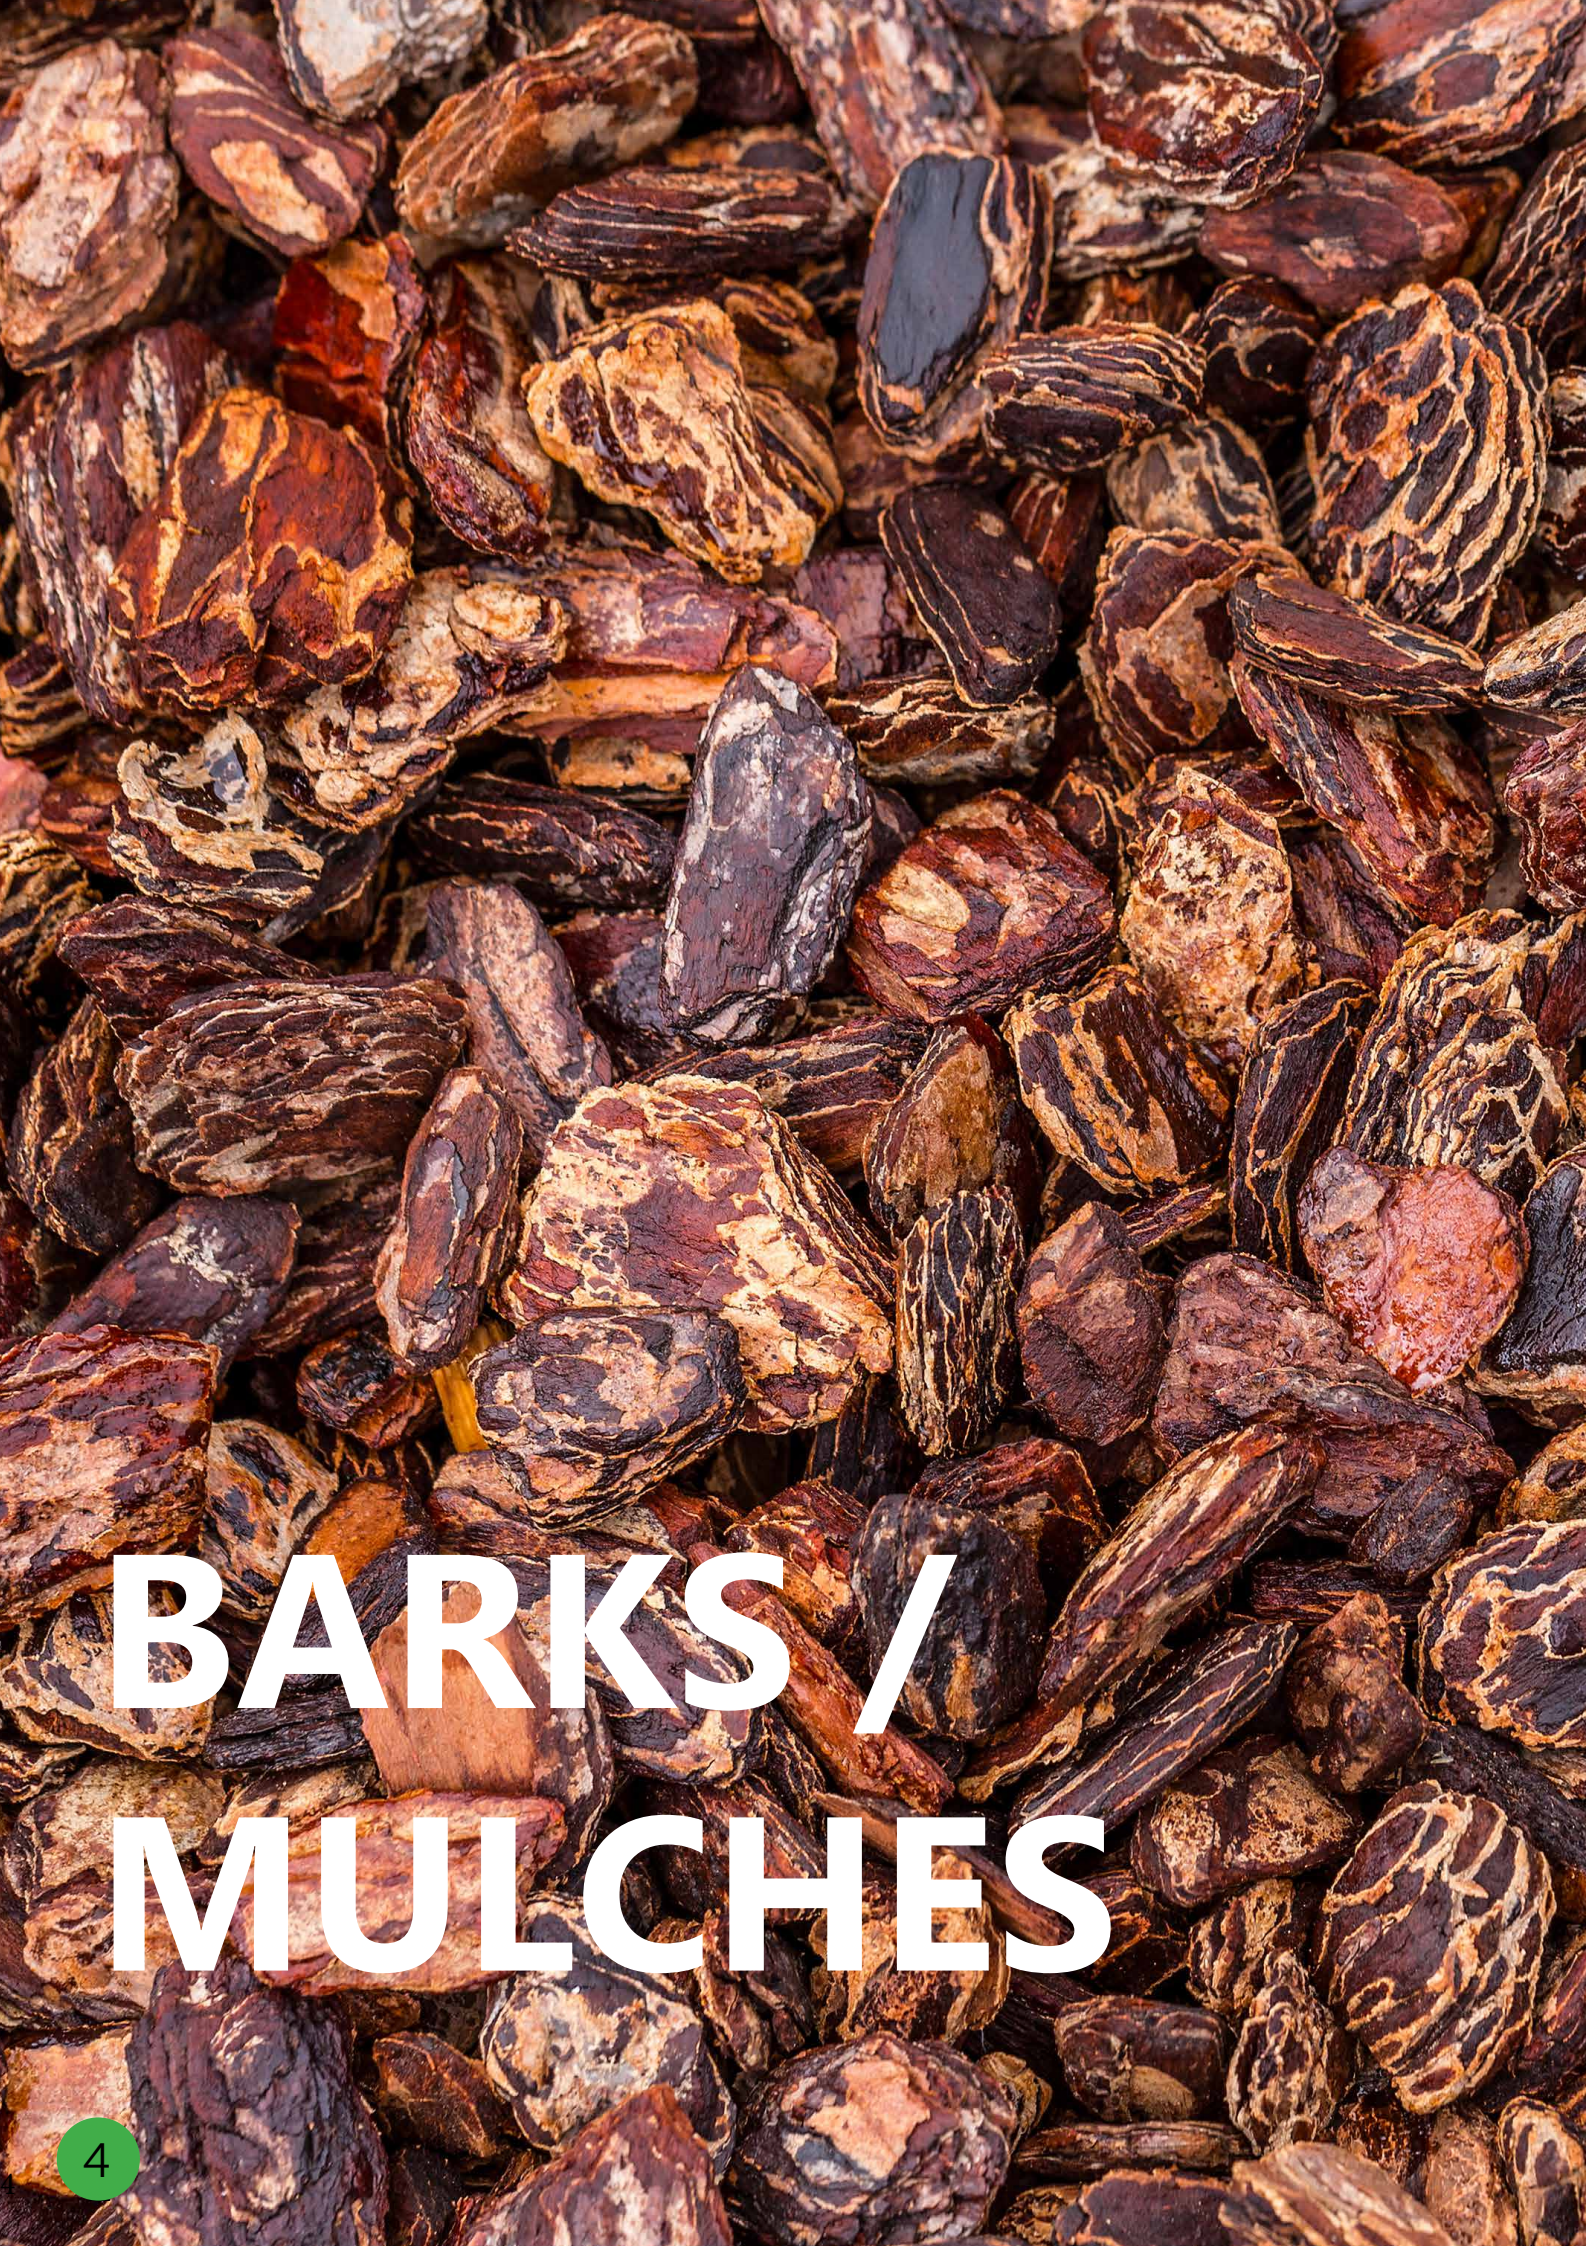

"We believe in being resourceful and making the most of what we have been given."

Making the most of what we have been given relates to every area of our business. From the development of people and organisations within our circular economy, to the natural resources we work with.

We care for what we have been given, we add value and develop intelligently, whether it be our relationships or the sustainability practices that are core to our business.

We believe in being resourceful...
in making the most of what we have been given

BARKS / MULCHES

Chocolate Mini Chip is a rich dark-brown chip which is great as a ground covering to suit any garden style. Traditionally used by landscapers as a cost-effective way to bring out the plant features of a garden, Chocolate Mini Chip is a consistent product well-suited for native-themed or secluded-area gardens. With sizing on the smaller size, it can feed nutrients back into the soil while maintaining a great look above the ground. Because of its APF properties, Chocolate Mini Chip is also used in potting mixes.

PRODUCT SPECIFICATIONS

Particle size:	8-12mm
Product type:	Decorative mulch
Slope tolerability:	28°
Colour:	Chocolate-brown
Wind resistance rating:	B
AFP:	48.3%
Bulk density:	500kg/m ³

HANDLING & APPLICATION PROCESS

Chocolate Mini Chip is suitable for storing outside. Apply at a depth of 100mm.

CUSTOM PRICING & SAMPLES

For project-specific quotes [please contact our sales team to discuss](#).

RECOMMENDED USE

Home garden beds as a ground cover.

Any residential landscaping.

Architecturally-designed or high-profile areas.

INGREDIENTS

Pine bark chip 8-12mm.

APPROXIMATE FREIGHTING VOLUMES (FULL UNITS)

Approximately 55m³ per truck-trailer unit.

Approximately 25m³ per truck-only unit.

The ultimate mulch when it comes to landscaping. Known all over New Zealand as the solution to suppressing weeds in the spring and retaining moisture over the summer months, Forest Floor® is an all-year-round worker for your garden. During the colder months Forest Floor® also helps moderate soil temperatures as frosts may come and go. Forest Floor® contains bark fines, right up to 100mm length shreds, which allows it to bind together on steep slopes and remain in place in exposed areas. As a result of the fines aging, your garden will be fed a constant supply of nutrients over a long term. Forest Floor® is simply the most cost-effective bark for coverage.

PRODUCT SPECIFICATIONS

Particle size:	0-100mm
Product type:	Purpose-built mulch
Slope tolerability:	52°
Colour:	Chocolate-brown
Wind resistance rating:	A+
AFP:	41.2%
Bulk density:	300kg/m ³

HANDLING & APPLICATION PROCESS

Forest Floor® is suitable for storing outside. Apply at a depth of 100mm.

CUSTOM PRICING & SAMPLES

For project-specific quotes [please contact our sales team to discuss.](#)

RECOMMENDED USE

Sloped sections.

Large landscaping projects.

Moisture-compromised or exposed areas.

INGREDIENTS

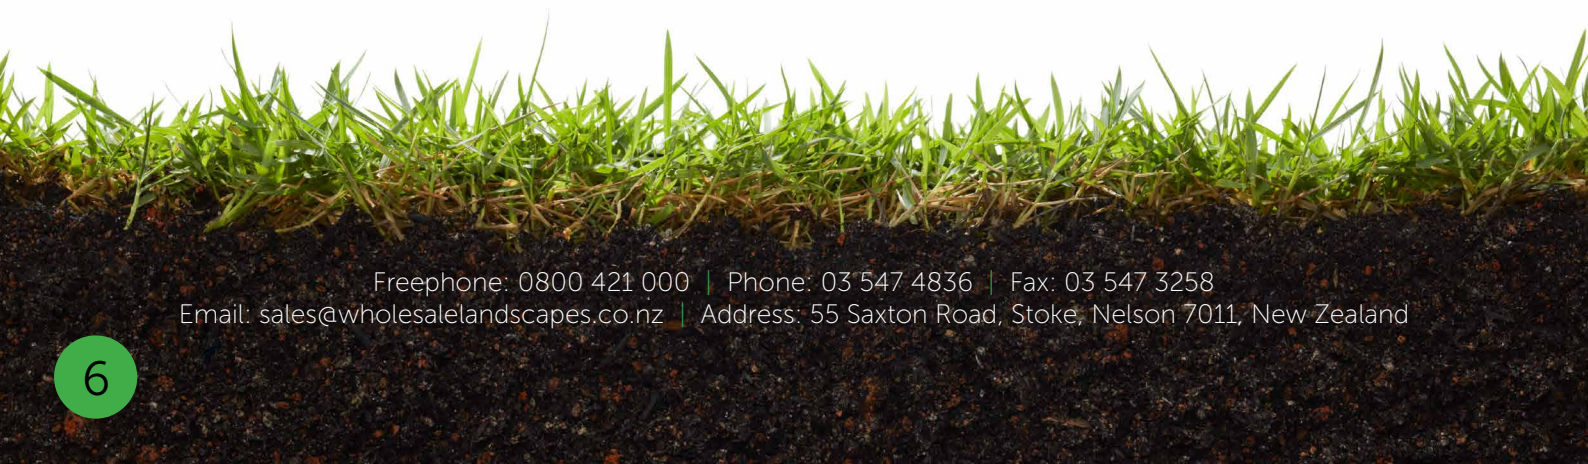

Pine bark fines.

Pine bark cambium and shredded bark.

APPROXIMATE FREIGHTING VOLUMES (FULL UNITS)

Approximately 60m³ per truck-trailer unit.

Approximately 30m³ per truck-only unit.

This innovative and trending product has been perfected for home gardens or contained areas. The jet-black look, derived from a safe, environmentally-friendly, water-based colourant is the key to a fashionable modern-style ground covering. Not only is Black Forrest® a purpose-built decorative mulch, but it also suppresses weeds and helps the soil retain moisture to enhance the garden's foundation underground.

PRODUCT SPECIFICATIONS

Particle size:	0-70mm
Product type:	Decorative mulch
Slope tolerability:	55°
Colour:	Jet-black
Wind resistance rating:	A
AFP:	58.2%
Bulk density:	400kg/m ³

HANDLING & APPLICATION PROCESS

Black Forrest® is suitable for storing outside. Apply at a depth of 100mm.

CUSTOM PRICING & SAMPLES

For project-specific quotes [please contact our sales team to discuss.](#)

RECOMMENDED USE

Planter or container boxes.

Sloping areas.

Architecturally-designed or high-profile areas.

INGREDIENTS

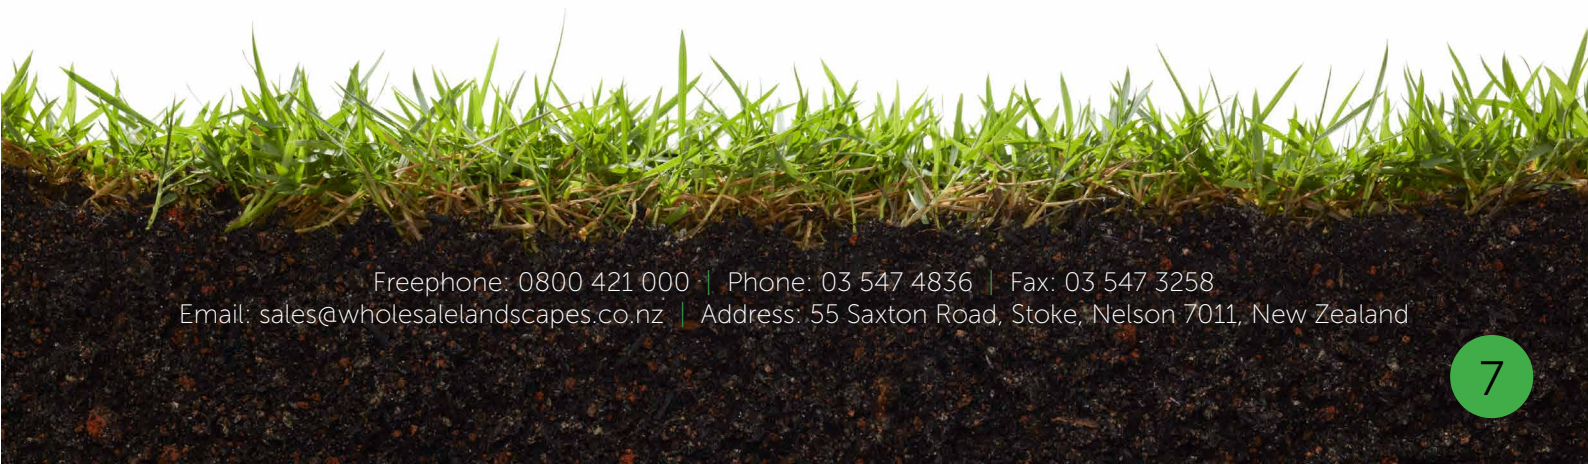

100% natural Black Forrest® carbon colourant.

Pine flake wood particle sized 0-70mm.

APPROXIMATE FREIGHTING VOLUMES (FULL UNITS)

Approximately 60m³ per truck-trailer unit.

Approximately 30m³ per truck-only unit.

Deco No.1 is a decorative mulch which is great for large areas where maintaining a profile is still important. Its mix of cambium, stringy bark and chip helps build a ground-cover that keeps the consistent look while also providing mulching properties of bark. The mix also holds on to slopes which expands its ability to be used on property sections which would otherwise be limited to mulch. Why settle for mulch or a decorative bark when you can have this combination of both? Also see Deco No.2 for a bulkier version of this product.

PRODUCT SPECIFICATIONS

Particle size:	10-25mm
Product type:	Decorative mulch
Slope tolerability:	38°
Colour:	Chocolate-brown
Wind resistance rating:	B
AFP:	47.2%
Bulk density:	400kg/m ³

HANDLING & APPLICATION PROCESS

Deco No.1 is suitable for storing outside.

Apply at a depth of 100mm.

For project-specific quotes [please contact our sales team to discuss.](#)

RECOMMENDED USE

Sloped sections.

Moisture-compromised gardens.

Larger high-profile areas.

INGREDIENTS

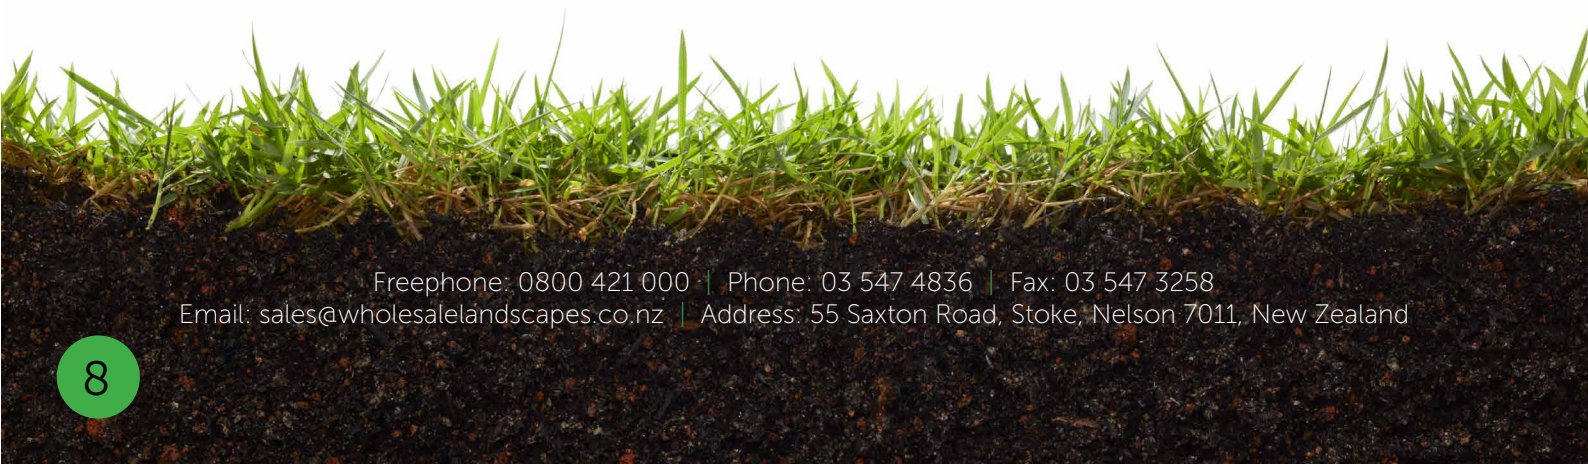

[Pine](#) cambium bark.

[Pine bark](#) chip 10-25mm.

APPROXIMATE FREIGHTING VOLUMES (FULL UNITS)

Approximately 60m³ per truck-trailer unit.

Approximately 30m³ per truck-only unit.

Deco No.2 is a decorative mulch which is great for large areas where maintaining a profile is still important. Its mix of cambium, stringy bark and chip helps build a groundcover that keeps the consistent look while also providing mulching properties of bark. The mix also holds on to slopes which expands its ability to be used on property sections which would otherwise be limited to mulch. Why settle for mulch or a decorative bark when you can have this combination of both? Also see Deco No.1 for a lighter version of this product.

PRODUCT SPECIFICATIONS

Particle size:	25-50mm
Product type:	Decorative mulch
Slope tolerability:	38°
Colour:	Chocolate-brown
Wind resistance rating:	B
AFP:	48.5%
Bulk density:	400kg/m ³

HANDLING & APPLICATION PROCESS

Deco No.2 is suitable for storing outside.

Apply at a depth of 100mm.

CUSTOM PRICING & SAMPLES

For project-specific quotes [please contact our sales team to discuss.](#)

RECOMMENDED USE

Sloped sections.

Moisture-compromised gardens.

Larger high-profile areas.

INGREDIENTS

Pine cambium bark.

Pine bark chip 25-50mm.

APPROXIMATE FREIGHTING VOLUMES (FULL UNITS)

Approximately 60m³ per truck-trailer unit.

Approximately 30m³ per truck-only unit.

Often described as the most consistent bark product on the market, this chip is best used in high-profile areas where consistency is a theme. Since 2003, Premo Chip has been one of the most successful of Wholesale Landscapes' brands. With soil temperature regulation properties, this traditionally-styled bark will never go out of fashion and will remain popular for years to come. Premo Chip is the first choice in private playgrounds where certification isn't mandatory.

PRODUCT SPECIFICATIONS

Particle size:	10-25mm
Product type:	Decorative bark
Slope tolerability:	32°
Colour:	Chocolate-brown
Wind resistance rating:	A
AFP:	64%
Bulk density:	350kg/m ³

INGREDIENTS

Pine bark chip 10-25mm.

APPROXIMATE FREIGHTING VOLUMES (FULL UNITS)

Approximately 60m³ per truck-trailer unit.

Approximately 30m³ per truck-only unit.

RECOMMENDED USE

 Traditionally-styled residential gardens.

 Small flat sections.

 Private playgrounds.

HANDLING & APPLICATION PROCESS

Premo Chip is suitable for storing outside. Apply at a depth of 100mm. (300mm depth for playgrounds.) For public playground media, such as for schools and reserves, refer to our certified Bounce Bark product.

CUSTOM PRICING & SAMPLES

For project-specific quotes please contact our sales team to discuss.

As with Premo Chip, this nugget is best used in high-profile areas where its reliable consistency will best feature. Premo Nuggets has been another highly successful brand for Wholesale Landscapes. With moisture-retention and weed-suppression properties, this traditionally- styled bark nugget is set to remain a best-seller. Premo Nuggets is a great choice for private playgrounds where certification is not mandatory.

PRODUCT SPECIFICATIONS

Particle size:	25-50mm
Product type:	Decorative bark
Slope tolerability:	34°
Colour:	Chocolate-brown
Wind resistance rating:	A+
AFP:	67%
Bulk density:	350kg/m ³

INGREDIENTS

Pine bark nugget sized 25-50mm.

APPROXIMATE FREIGHTING VOLUMES (FULL UNITS)

Approximately 60m³ per truck-trailer unit.

Approximately 30m³ per truck-only unit.

RECOMMENDED USE

Traditionally-styled residential gardens.

Small flat sections.

Private playgrounds.

HANDLING & APPLICATION PROCESS

Premo Nugget is suitable for storing outside. Apply at a depth of 100mm. (300mm depth for playgrounds.) For public playground media, such as for schools and reserves, refer to our certified Bounce Bark product.

CUSTOM PRICING & SAMPLES

For project-specific quotes [please contact our sales team to discuss.](#)

Bark Fines is a great-value fine bark, screened to a 0-8mm medium. Weed-suppression and moisture-retention are natural properties of fine bark products. However, this aged fines product goes one step further. With consistent sizing, this entirely organic product is quickly assimilated into the soil and will limit future compaction. Especially beneficial when added remedially to clay or compacted soils, Bark Fines will help plants access soil nutrients. Bark Fines is 100% organic-compliant and is suitable for application in areas which are certified organic.

PRODUCT SPECIFICATIONS

Particle size:	0-8mm
Product type:	Fine mulch
Slope tolerability:	26°
Colour:	Chocolate-brown
AFP:	20.2%
Bulk density:	600kg/m ³

HANDLING & APPLICATION PROCESS

Bark Fines are suitable for storing outside. Apply at a depth of 100mm.

CUSTOM PRICING & SAMPLES

For project-specific quotes [please contact our sales team to discuss](#).

RECOMMENDED USE

Organic-compliant areas.

Large areas with clay-based soil.

Topdressing or mixing in with other media as a conditioner.

INGREDIENTS

Pine bark fines sized 0-8mm.

APPROXIMATE FREIGHTING VOLUMES (FULL UNITS)

Approximately 45m³ per truck-trailer unit.

Approximately 20m³ per truck-only unit.

SOIL

A quality screened soil, processed to a uniformly-fine grade of under 12mm, Screened Soil is particularly easy to spread. Screened Soil is the best product to use if you are making a new grass area or garden, as it provides fast germination and ensures the development of good root structure. This is the media preferred by professional landscapers and contractors for new lawns, parks and general landscaping projects. Great for levelling-out new sites, building up lawns or bulking up the landscape when establishing gardens.

PRODUCT SPECIFICATIONS

Particle size:	0-12mm
Product type:	Screened base media
Bulk density:	1100kg/m ³

NOTE: We source Screened Soil from sites that have met our guideline criteria, which is minimal to no weed content. Weed-free soil can only be guaranteed by fumigation.

HANDLING & APPLICATION PROCESS

We advise storing Screened Soil undercover, if not planning immediate use.

CUSTOM PRICING & SAMPLES

For project-specific quotes [please contact our sales team to discuss](#).

RECOMMENDED USE

Final levelling around house sites.

Building up areas in preparation for lawns.

Backfilling smaller holes.

INGREDIENTS

Screened soil sourced from safe, non-contaminated sites.

APPROXIMATE FREIGHTING VOLUMES (FULL UNITS)

Approximately 21m³ per truck-trailer unit.

Approximately 10m³ per truck-only unit.

A quality screened soil, processed to a fine uniform size and mixed with high-quality Flourish compost. Super Soil is a product which is convenient to handle and is the best product for new landscapes and gardens. Due to fungal activity within this mushroom-compost base, nutrients are made easily available and accessible by roots. Super Soil promotes fast germination and good root structure while providing a resilient base. Used by homeowners, professional landscapers and contractors to establish new gardens, for planting from bags into the ground and other general landscaping projects.

PRODUCT SPECIFICATIONS

Particle size:	0-12mm
Product type:	Compost-soil blend
pH:	6.0-7.0
AFP:	12.1%
Bulk density:	900kg/m ³

*due to the organic base, pH is an indicative average only.

HANDLING & APPLICATION PROCESS

We advise keeping Super Soil undercover if not planning immediate use.

Super Soil is great for direct planting of any mainstream plant varieties.

APPROXIMATE FREIGHTING VOLUMES (FULL UNITS)

Approximately 23m³ per truck-trailer unit.

Approximately 11m³ per truck-only unit.

RECOMMENDED USE

New garden beds.

Building-up established areas.

Backfilling when re-designing planting areas.

INGREDIENTS

100% Screened soil sourced from safe and non-contaminated sites.

Mushroom-compost base to promote fungal activity.

Sheep and chicken manures (rich nutrient source).

CUSTOM PRICING & SAMPLES

For project-specific quotes please contact our sales team to discuss.

Lawn Soil is a very high-quality and fine medium which is excellent for topdressing turf and lawns. The fine particle size and free-flowing blend spreads easily and effortlessly between grass blades and under the grass canopy to the roots. Retains moisture well for fast seed germination and adds organic matter, as well as nutrients into the ground to promote healthy soil condition. If you have an existing lawn, applying Lawn Soil will result in your lawn being well fed, over a long period, with nutrients and it will also fill in any hollows. Lawn Soil is a premium mix of sand and aged bark fines and manures. It allows for a faultless start for seed germination in a bed of free-draining media, whilst providing on-going nutrients for fast and effective growth. Lawn Soil is the product you need if you are establishing a new lawn or renovating an existing one.

PRODUCT SPECIFICATIONS

Particle size:	0-8mm
Product type:	Nutritional soil blend
pH:	6.1
AFP:	18.8%
Bulk density:	1000kg/m ³

*due to the organic base, pH is an indicative average only.

HANDLING & APPLICATION PROCESS

Lawn Soil is suitable for storing in piles outside. For new lawns, build up the preparation area with Screened Soil to the desired level. Apply Lawn Soil at a depth of between 15-30mm.

CUSTOM PRICING & SAMPLES

For project-specific quotes [please contact our sales team to discuss.](#)

RECOMMENDED USE

-  Existing lawn renovation.
-  New lawn preparation.

INGREDIENTS

Aged bark fines sized 0-8mm.

Washed pH-neutral sand to help with drainage.

Aged manures as a rich nutrient source.

APPROXIMATE FREIGHTING VOLUMES (FULL UNITS)

Approximately 23m³ per truck-trailer unit.

Approximately 11m³ per truck-only unit.

Known as 'the superior super soil', Wholesale Landscapes' BioRetain has the best qualities of our compost-soil blends with the extra addition of wetting agents and water crystals. The application of BioRetain means a growing tree or shrub is not solely dependent on rainfall. The water crystals are able to hold 400 times their own weight in water, absorbed from excess irrigation, so that in the dryer months plants can thrive in a moist and nutrient-rich environment. Great for urban planting and preparing pits for trees, shrubs and large plants.

PRODUCT SPECIFICATIONS

Particle size:	0-12mm
Product type:	Compost-soil blend
pH:	6.0-7.0
AFP:	12.1%
Bulk density:	900kg/m ³

*due to the organic base, pH/AFP is an indicative average only.

INGREDIENTS

100% Screened soil sourced from safe and non-contaminated sites.

Mushroom-compost base to promote fungal activity.

Sheep and chicken manures as a rich nutrient source.

Wetting agents containing water crystals to retain moisture.

CUSTOM PRICING & SAMPLES

For project-specific quotes please contact our sales team to discuss.

RECOMMENDED USE

-  Commercial areas with contained trees.
-  Trees with limited exposure to moisture.
-  Backfilling when re-designing planting areas.

HANDLING & APPLICATION PROCESS

We advise keeping BioRetain undercover, if not planning immediate use. BioRetain is great for direct planting of any mainstream plant varieties.

APPROXIMATE FREIGHTING VOLUMES (FULL UNITS)

Approximately 23m³ per truck-trailer unit.

Approximately 11m³ per truck-only unit.

COMPOST

Made from bio-products sourced from freezing works' waste and sheep manures, this odourless organic bark fine-based compost is excellent for large-scale plantings or establishing newly planted areas. Composted over a 12-month period and free from chemical sterilisation, Barnyard Compost is an organic-based compost which has gone through a natural heating process to kill weeds. Great for application in rural areas and lifestyle blocks.

PRODUCT SPECIFICATIONS

Particle size:	0-12mm
Product type:	Nutritional compost
pH*:	5.5-6.0
AFP:	24%
Bulk Density:	750kg/m ³

*due to the organic base, pH/AFP is an indicative average only.

INGREDIENTS

Screened bark fines as a source of carbon for increased microbial activity.

Animal Manures rich in trace elements.

Bio-products nutrient-rich sourced from freezing works' waste.

APPROXIMATE FREIGHTING VOLUMES (FULL UNITS)

Approximately 40m³ per truck-trailer unit.

Approximately 16m³ per truck-only unit.

RECOMMENDED USE

Mixing with existing soils.

Large-scale planting areas.

Establishing large rural or lifestyle block sections.

HANDLING & APPLICATION PROCESS

Barnyard Compost is suitable for storing outside for later use. Apply when the product is slightly damp by digging into the current ground media at the depth of the plant root structure.

CUSTOM PRICING & SAMPLES

For project-specific quotes **please contact our sales team to discuss.**

Made from marine bio-products and organic bark fines, this odourless compost is excellent for home vegetable gardens and flower beds. Composted over a 12-month period and free from chemical sterilisation, FishGro Compost is an organic-based compost which has gone through a natural heating process to kill weeds. FishGro Compost helps retain soil moisture and provides a great foundation for roots to quickly access much-needed nutrients and trace elements.

PRODUCT SPECIFICATIONS

Particle size:	0-12mm
Product type:	Nutritional compost
pH*:	5.7
AFP:	22%
Bulk density:	750kg/m ³

*due to the organic base, pH/AFP is an indicative average only.

INGREDIENTS

Marine bio-products for long term-plant food.

Screened bark fines as a source of carbon for increased microbial activity.

CUSTOM PRICING & SAMPLES

For project-specific quotes **please contact our sales team to discuss.**

RECOMMENDED USE

Direct planting or mixing with soil.

Vegetable gardens, including organic-compliant areas.

For commercial use, as a rich source of nutrients and trace elements.

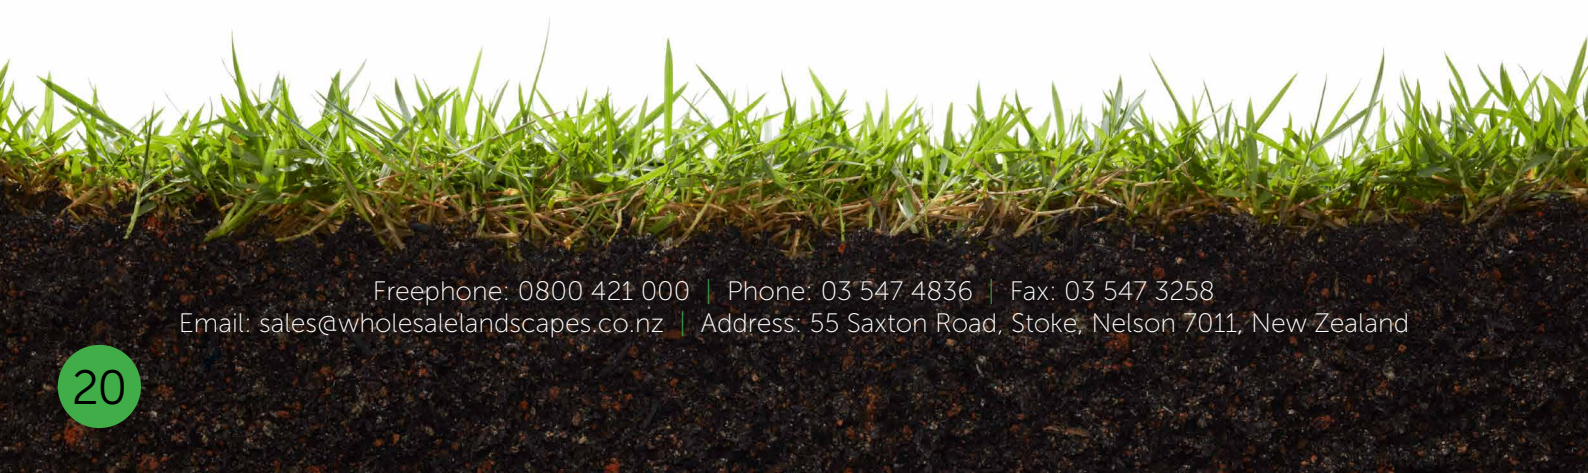

HANDLING & APPLICATION PROCESS

FishGro Compost is suitable for storing outside for later use. Apply when the product is slightly damp by digging into the current ground media at the depth of the plant root structure.

APPROXIMATE FREIGHTING VOLUMES (FULL UNITS)

Approximately 38m³ per truck-trailer unit.

Approximately 16m³ per truck-only unit.

Flourish Compost - it's all in the name. Flourish is a well-known brand, trusted by many New Zealanders when they need powerful, highly-nutritious compost. Very popular with hobby gardeners and landscapers, Flourish Compost finishes projects to the highest standard. With a mushroom-compost base and organic bark fines, this odourless compost creates a perfect environment for root generation due to its inherent fungal activity. Composted over a 12-month period and free from chemical sterilisation, Flourish is an organic-based compost which has gone through a natural heating process to kill weeds.

PRODUCT SPECIFICATIONS

Particle size:	0-12mm
Product type:	Nutritional compost
pH*:	6.8
AFP:	21%
Bulk density:	750kg/m ³

*due to the organic base, pH/AFP is an indicative average only.

HANDLING & APPLICATION PROCESS

Flourish Compost is suitable for storing outside for later use. Apply when the product is slightly damp by digging into the current ground media at the depth of the plant root structure.

APPROXIMATE FREIGHTING VOLUMES (FULL UNITS)

Approximately 38m³ per truck-trailer unit.

Approximately 16m³ per truck-only unit.

RECOMMENDED USE

Breaking up clay soils.

Vegetable or flower gardens.

Annual nutrient top-up for plants.

INGREDIENTS

Mushroom-compost based to promote fungal activity for long term-plant nutrition.

Sheep and chicken manures rich in nutrients.

Screened bark fines as a source of carbon for increased microbial activity.

CUSTOM PRICING & SAMPLES

For project-specific quotes **please contact our sales team to discuss.**

TECHNICAL MEDIA

Biofiltration is the energy-efficient technology for the control of volatile organic compounds (VOCs). Biofiltration controls odours from wastewater treatment facilities, compost facilities, rendering plants and other odour-producing operations. This process uses a media mix of natural carbon and trace elements to create an active biological bed through which VOCs are passed. Contaminant compounds diffuse from the gas phase to the liquid or solid phase in the media bed. They then transfer to the Biofilm layer where microbial growth occurs and the contaminants are biodegraded. When working efficiently, the biofiltration media removes more than 90% of the air pollutants, including those that some agencies class as hazardous. Maintenance involves media replacement, moisture control of the filter bed, hardware upkeep and some special requirements depending on the specific biofilter chosen. Most biofilter systems provide for automatic monitoring and logging of gas temperatures, pressures, humidity and flow rate. Bed media and filtration require manual testing.

PRODUCT SPECIFICATIONS

Particle size:	0-50mm
Product type:	Technical media
Wind resistance rating:	B
pH*:	6.8-8.0
AFP:	44%
Bulk density:	700kg/m ³

*due to the organic base, pH/AFP is an indicative average only.

INGREDIENTS

Bark fines to create an environment suitable for microbe activity.

Nuggets and cambium bark which support a higher AFP.

Organic shell to assist with deodorising.

CONSULTANCY

Wholesale Landscapes have the capabilities to provide expert consultants to advise on your project. Common services undertaken by Wholesale Landscapes include testing of current conditions, reporting findings and creating a recipe and product suitable for your site.

APPROXIMATE FREIGHTING VOLUMES (FULL UNITS)

Approximately 42m³ per truck-trailer unit.

Approximately 17m³ per truck-only unit.

CUSTOM PRICING & SAMPLES

Known as 'the schools' choice when safety is first', Bounce Bark Chip is well known for its impact-protection properties. Under kids' feet all over the South Island, Bounce Bark Chip ensures they are playing in the safest environment possible. This not only means that parents worry less but it also reduces the risk of liability for property managers, principals and board members, as it is NZ standard-certified. Although Bounce Bark Chip is washed to eliminate transferable mud, this natural bark product will still help to promote the development of a healthy immune system through play in nature. Bounce Bark Chip is a naturally-occurring by-product of sustainable forestation and forms part of our circular economy which eliminates landfill disposal. Bounce Bark is the environmentally-responsible choice for playground impact-protection. Bounce Bark Chip's small size is proven to be softer and more comfortable, particularly for toddlers' feet.

PRODUCT SPECIFICATIONS

Particle size:	10-25mm
Product type:	Certified media
Certification:	NZS5828:2015
Temperature resilience:	45°C
Wind resistance rating:	A
Bulk density:	400kg/m ³

SHELL

Ocean Shell Mini is an aged, deodorised and crushed mussel shell, with particles sized between 0-18mm. Ocean Shell Mini helps retain moisture which increases the effectiveness of irrigation. Ocean Shell Mini allows plants to flourish without fighting for nutrients due to its weed-suppression properties. Its white colour also reduces the risk of pests through providing light reflectiveness under and around plants. All Ocean Shell Mini products are organic-compliant and are acceptable for use in certified-organic areas.

PRODUCT SPECIFICATIONS

Particle size:	0-18mm
Product type:	Decorative shell
Slope tolerability:	22°
Wind resistance rating:	B
Colour:	White
Bulk density:	1000kg/m ³

HANDLING & APPLICATION PROCESS

Ocean Shell Mini is suitable to be stored outside. For best results apply at a depth of 50mm for paths and 100mm for gardens.

CUSTOM PRICING & SAMPLES

RECOMMENDED USE

Paths or residential gardens.

Organic-compliant growing areas.

Drought-prone areas.

INGREDIENTS

[Organic](#) screened deodorised mussel shell.

APPROXIMATE FREIGHTING VOLUMES (FULL UNITS)

Approximately 38m³ per truck-trailer unit.

Approximately 12m³ per truck-only unit.

Ocean Shell is an aged, deodorised crushed mussel shell, with particles sized between 0-70mm. Ocean Shell helps retain moisture which increases the effectiveness of irrigation. Ocean Shell allows plants to flourish without fighting for nutrients due to its weed-suppression properties. Its white colour also reduces the risk of pests through providing light reflectiveness under and around plants. All Ocean Shell products are organic-compliant and are acceptable for use in certified-organic areas.

PRODUCT SPECIFICATIONS

Particle size:	0-70mm
Product type:	Shell Mulch
Slope tolerability:	24°
Wind resistance rating:	A
Colour:	White
Bulk density:	700kg/m ³

HANDLING & APPLICATION PROCESS

Ocean Shell is suitable to be stored outside. For best results apply at a depth of 50mm for paths and 100mm for gardens.

CUSTOM PRICING & SAMPLES

For project-specific quotes [please contact our sales team to discuss.](#)

RECOMMENDED USE

Under vines as pest reduction.

Organic-compliant growing areas.

Drought-prone areas.

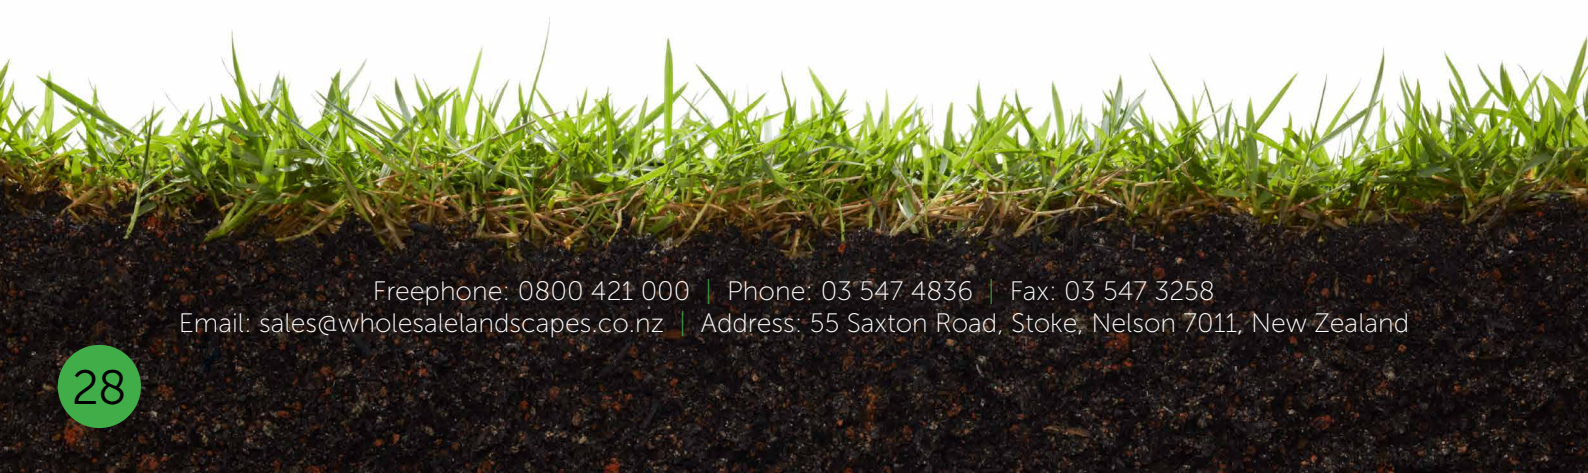

INGREDIENTS

Organic deodorised mussel shell.

APPROXIMATE FREIGHTING VOLUMES (FULL UNITS)

Approximately 38m³ per truck-trailer unit.

Approximately 16m³ per truck-only unit.

Ocean Shell Whole is an aged, deodorised whole mussel shell, with particles sized between 70-100mm. Ocean Shell Whole helps retain moisture which increases the effectiveness of irrigation. Ocean Shell Whole allows plants to flourish without fighting for nutrients due to its weed-suppression properties. Its white and bright colour also enhances seaside gardens and coastal areas. Ocean Shell is excellent as a finishing product for visual appeal in exotic-themed gardens. All Ocean Shell products are organic-compliant and acceptable for use in certified-organic areas.

PRODUCT SPECIFICATIONS

Particle size:	70-100mm
Product type:	Decorative shell
Slope tolerability:	21°
Wind resistance rating:	A
Colour:	White
Bulk density:	300kg/m ³

HANDLING & APPLICATION PROCESS

Ocean Shell Whole is suitable to be stored outside. For best results apply at a depth of 100mm for gardens.

CUSTOM PRICING & SAMPLES

For project-specific quotes [please contact our sales team to discuss.](#)

RECOMMENDED USE

Seaside gardens.

Organic-compliant growing areas.

Exotic-themed landscapes.

INGREDIENTS

Organic whole deodorised mussel shell.

APPROXIMATE FREIGHTING VOLUMES (FULL UNITS)

Approximately 60m³ per truck-trailer unit.

Approximately 30m³ per truck-only unit.

POTTING MIX

Garden Gro is a compost-based growing media which allows plants to get the best start possible. With its Barnyard Compost and sand base, it also provides long-term moisture retention and long-term nutrient supply. The addition of short-term fertiliser boosts growth from the get-go. Garden Gro is a go-to option for raised beds and vegetable gardens. It is an excellent solution for gardeners who want hassle-free, no-maintenance growing media.

PRODUCT SPECIFICATIONS

Particle size:	0-12mm
Product type:	Fertilised media
pH*:	6.7
AFP:	20.3%
Bulk density:	800kg/m ³

*due to the organic base, pH is an indicative average only.

HANDLING & APPLICATION PROCESS

Garden Gro is suitable for storing outside but should be utilised within 3 weeks of purchase. Apply the product slightly damp.

Best suited to new garden beds or as a top-up for existing beds.

CUSTOM PRICING & SAMPLES

For project-specific quotes [please contact our sales team to discuss.](#)

RECOMMENDED USE

Vegetable gardens.

Raised garden beds.

Contained areas such as pots or planter boxes.

INGREDIENTS

Screened aged bark fines sized 0-12mm.

Controlled-release fertilisers effective for 3-4 months.

APPROXIMATE FREIGHTING VOLUMES (FULL UNITS)

Approximately 38m³ per truck-trailer unit.

Approximately 16m³ per truck-only unit.

Pot N Gro is the 'best of the best' when it comes to growing media. A finely-tuned recipe which is great for growing vegetables and potted or tubbed plants. The bark-base blend allows not only for quick, progressive root development and great moisture retention, but also provides the maintenance of a constant pH level. With added trace elements, long-term, (8-9 month), controlled-release fertilisers, wetting agents and more, using Pot N Gro means you won't have to worry about feeding your plants for months.

PRODUCT SPECIFICATIONS

Particle size:	0-12mm
Product type:	Fertilised media
pH:	5.5-6.0
AFP:	15.3%
Bulk density:	800kg/m ³

HANDLING & APPLICATION PROCESS

Pot N Gro is suitable for storing outside but should be utilised within 3 weeks of purchase.

Application is recommended when product is slightly damp. To achieve the best results use in contained or raised-bed areas.

APPROXIMATE FREIGHTING VOLUMES (FULL UNITS)

Approximately 40m³ per truck-trailer unit.

Approximately 18m³ per truck-only unit.

RECOMMENDED USE

Seedling trays and PB bags.

Garden pots.

Raised garden beds, containers, or contained areas.

INGREDIENTS

Neutralised Bark fines sourced from selected sites which are free of contaminants.

Essential trace elements to promote increased crop growth.

Wetting agents to allow for moisture retention.

Controlled release fertilisers effective for 8-9 months.

CUSTOM PRICING & SAMPLES

For project-specific quotes **please contact our sales team to discuss.**

Utilising our purpose-built potting mix complex, which includes an onsite laboratory, Wholesale Landscapes have the expertise and capability to meet your specific potting mix needs. Starting with our own in-house neutralised, aged bark-based media, we incorporate market-leading controlled-release fertilisers, wetting agents and trace elements to provide potting mixes which will develop your plants' root structure and produce the best possible growth patterns. You can choose from a range of peat, pumice and coir fibre to add to the base media. Our specialist technical team will consult with you to design a recipe to meet your key needs.

PRODUCT SPECIFICATIONS

Particle size:	0-8 to 0-12mm
Product type:	Fertilised media
pH:	4.5-6.5
AFP:	15-48%
Bulk density:	650-800kg/m ³

HANDLING & APPLICATION PROCESS

For long-term projects or plantings we recommend storing mixes under cover until utilised. Alternatively, use within 2 weeks of delivery. Potting mixes are designed for contained areas such as garden beds, tubs, pots and bags.

APPROXIMATE FREIGHTING VOLUMES (FULL UNITS)

Approximately 36m³ per truck-trailer unit.

Approximately 18m³ per truck-only unit.

1m³ bulk bags also available.

RECOMMENDED USE

Seedling trays and PB bags.

Commercial nurseries.

Hobby gardeners.

INGREDIENTS

Our in-house technical team will consult with you and advise on a mix to meet your specific requirements. We manufacture the base media and stock an extensive range of controlled-release fertilisers and other components to efficiently complete your specialist mix.

HORTICULTURE MEDIA

HortGro Compost is a free-flowing, nutritious compost produced from fine bark, mulch, freezing works' waste bio-products and other active fertilising ingredients. It is free from residual herbicides, sprays and fungicides and has no greenwaste component. HortGro Compost is the most proven compost for commercial growers and farmers, having been manufactured and sold by Wholesale Landscapes for more than 10 years. HortGro Compost will give better crop quality and faster crop return by increasing organic matter, carbon contents and moisture retention in soil, leading to healthier and more productive plants. HortGro Compost is 100% organic-compliant and is suitable for application in areas which are certified organic. Wholesale Landscapes are happy to provide documentation in support of this.

PRODUCT SPECIFICATIONS

Particle size:	0-20mm
Product type:	Nutritional compost
pH*:	6.0
AFP:	26.3%
Bulk density:	750kg/m ³

*due to the organic base, pH is an indicative average only.

APPROXIMATE FREIGHTING VOLUMES (FULL UNITS)

Approximately 38m³ per truck trailer unit.

Approximately 16m³ per truck only unit.

HANDLING & APPLICATION PROCESS

HortGro Compost can be stored outside.

Apply product when slightly damp.

RECOMMENDED USE

Large-scale cropping.

Planting natives

Vineyards, orchards, farms and general commercial applications.

INGREDIENTS

Bark mulch sourced from selected contaminant-free sites.

Animal manures rich in nutrients and plant-supporting trace elements.

Bio-products nutrient-rich sourced from freezing works' waste.

Enhanced Bark Fines is a great-value aged fine bark screened to a 0-8mm medium. Weed-suppression and moisture-retention are natural properties of fine bark products. However, this aged fines product goes one step further due to its long aging process. With consistent sizing, this entirely organic product is quickly assimilated into the soil and will limit future compaction. Especially beneficial when added remedially to clay or compacted soils, Enhanced Bark Fines will help plants access soil nutrients. Bark Fines is 100% organic-compliant and is suitable for application in areas which are certified organic.

PRODUCT SPECIFICATIONS

Particle size:	0-8mm
Product type:	Fine bark
pH*:	6.0
AFP:	20.5%
Bulk density:	650kg/m ³

*due to the organic base, pH/AFP is an indicative average only.

HANDLING & APPLICATION PROCESS

Enhanced Bark Fines can be stored outside. Apply product when slightly damp.

Standard method of application recommended is a side-discharge spreader unit or product can be tilled into the soil prior to planting.

CUSTOM PRICING & SAMPLES

For project-specific quotes [please contact our sales team to discuss.](#)

RECOMMENDED USE

Vineyards and orchards via spreading unit.

Organic-compliant areas.

Mixing with other organic product to make a compost.

INGREDIENTS

Aged bark fines sized 0-8mm

APPROXIMATE FREIGHTING VOLUMES (FULL UNITS)

Approximately 40m³ per truck trailer unit.

Approximately 18m³ per truck only unit.

A neutralised, pH-adjusted, screened bark fine, available in sizes 0-8mm, 0-12mm or 8-12mm. This product has been through the aging process where moisture and temperature is monitored to ensure a stable and consistent base media. Pathogen and weed-free, Neutralised Bark also maintains a consistent AFP, which makes it a great base for potting mixes.

PRODUCT SPECIFICATIONS

Particle size:	0-8/0-12/8-12mm
Product type:	Bark fine
pH*:	6.0
AFP:	23.3%
Bulk density:	600kg/m ³

HANDLING & APPLICATION PROCESS

*If you need a mix with controlled-release fertilisers, please see our custom potting mixes.

APPROXIMATE FREIGHTING VOLUMES (FULL UNITS)

Approximately 36m³ per truck trailer unit.

Approximately 18m³ per truck only unit.

RECOMMENDED USE

Superior base for potting mixes.

Nurseries which manufacture their own potting mix.

INGREDIENTS

Bark fines sourced from selected sites which are free of contaminants.

Note: All neutralised barks are aged then neutralised in an accurate and monitored environment for a precise result.

Proven for its ability to promote soil moisture-retention and weed suppression, Viticulture Fines is a perfect bark medium for mixing with additional products to spread under vines. With its 0-12mm particle size, Viticulture Fines provides the foundation for increased microbial activity in the soil. Also adding to soil's carbon content, Viticulture Fines is great to mix in with grape marc and other nitrate-rich inputs. Viticulture Fines is 100% organic-compliant and is a cost-effective soil conditioner to apply to any crop-producing land.

PRODUCT SPECIFICATIONS

Particle size:	0-12mm
Product type:	Bark fine
pH*:	6.0
AFP:	24.3%
Bulk density:	600kg/m ³

*due to the organic base, pH/AFP is an indicative average only.

APPROXIMATE FREIGHTING VOLUMES (FULL UNITS)

Approximately 45m³ per truck trailer unit.

Approximately 20m³ per truck only unit.
