

Organic Solutions for Increased Profitability

Healthy **Soil**, Healthy **Crop**, Healthy **Profit**

BOOST ORGANIC MATTER

Building up organic matter in soil may be the most important thing you can do to enhance long term soil performance

NUTRIENT HOLDING

Brings the CEC level up in the soil to keep nutrients around the root system

MOISTURE RETENTION

Any applied water goes further, absorbing 6 times its weight allowing crops to thrive through dry spells

WEED SUPPRESSION

Especially important for young plants getting a head start

ROOT DEVELOPMENT

Bigger root systems take in more nutrients and water

REDUCES COMPACTION

Increases air and water movement in the soil, allowing for ample supply for root development

HORTGRO Compost

Hort Compost is the most proven compost for commercial growers and has been manufactured for more than 10 years. Hort Compost will give better crop quality, and faster crop return by retaining moisture in soil and increasing organic matter and carbon contents in the ground for more healthy and productive plants. Hort Compost will also provide weed suppression.

FISHGRO® Compost

FishGro Compost is stacked full of all the unique nutrients and fungi that ocean life has.

This compost has the potential to boost your fruit for amazing results. We have integrated marine life by-products these into a nutritious compost which also will benefit your soil condition hugely.

OCEAN SHELL

Ocean Shell is a 100% crushed mussel shell product. It's use as a ground covering increases moisture retention. Adds calcium and trace elements. Lifts light levels under trees and a great weed suppressant.

VITICULTURE FINES

A fully organic aged 0-12mm fine bark product. Can be used as a very good weed suppressant and/ or soil conditioning product, also can be used as a carbon source for Grape marc compost.

A **trusted advisor** in organic matters and profitability

Real Growers, Real Reviews

Wholesale Landscapes provide a great service to match the yield gains.

HortGro compost provides balancing in growth for struggling vines, working for 2-3 years as it gets down to the root system and it doubles as a natural weed suppressant

Aaron Best, Best Contracting

Using HortGro Compost has seen an immediate impact in our East Coast Marlborough vineyard. Soil moisture retention is the greatest noticeable difference which has seen better growth and crop across the block.

Locky Taylor, LM Taylor Farming

We've used Hort Compost on some of our Kiwifruit blocks. After applying it, we found impressive feeder root development and healthier canopy, contributing to better fruit.

Steve Thomas, Thomas Bros

Nautilus Estate have utilised viticulture fines from Wholesale Landscapes as carbon source in our grape marc compost for three seasons. The reliable supply of a uniform aged bark fine product has been very helpful in the resulting compost quality with a more rapid integration and homogenising with under vine soil.

*Mike Collins, Viticulturist,
Nautilus Estate of Marlborough*
